ABOUT THE CONFERENCE

The *First National Conference on Applied Physics (NCAP 2026)* is a high-level scientific conference that brings together researchers, academics, engineers, and industry professionals to share recent advances, emerging trends, and practical applications in the field of applied physics.

This conference aims to promote interdisciplinary exchanges and encourage collaboration between fundamental research and technological innovation. NCAP 2026 covers a wide range of topics, including advanced materials and material sciences, energy physics and sustainable technologies, optics, photonics and laser applications, medical physics and biophysics, computational physics and artificial intelligence, as well as sensors, instrumentation, and metrology. Through plenary lectures and oral communications, participants will have the opportunity to present their original research, discuss innovative methodologies, and propose applied solutions to current scientific and societal challenges.

The conference also seeks to strengthen national research networks, encourage young researchers, and promote knowledge transfer between academia and industry. By bringing together experts from various areas of applied physics, NCAP 2026 contributes to scientific development, technological progress, and sustainable innovation at the national level.

CONFERENCE TOPICS

Topics of interest include:

Topic 1: Advanced Materials and Material Sciences

Topic 2: Energy Physics and Sustainable Technologies

Topic 3: Optics, Photonics and Laser Applications

Topic 4: Medical Physics and Biophysics

Topic 5: Computational Physics and Artificial Intelligence

Topic 6: Sensors, Instrumentation and Metrology

LANGUAGE

English is the language of the conference

PROGRAM

The program of NCAP26 includes:

- Plenary conferences (30 minutes)
- Oral communications (15 minutes)
- Posters session
- An exhibition of startups and industrials
